

Job Title: Senior React Native Developer (MERN Stack Expert)

Location: On-site, Delhi.

Employment Type: Full-time

Experience: 5–8+ years

About the Role

We are seeking a highly skilled **Senior MERN Stack and React Native Developer (MongoDB, Express.js, React.js, React native, Node.js)**. The ideal candidate will take ownership of complex mobile and web application development end to end, provide technical leadership, and collaborate closely with cross-functional teams to deliver high-quality, scalable solutions.

Key Responsibilities

Mobile App Development (React Native)

- Develop, maintain, and enhance cross-platform mobile applications using **React Native**.
- Build reusable components and ensure seamless integration across iOS and Android.
- Optimize application performance, responsiveness, and user experience.
- Work with native modules when required and troubleshoot platform-specific issues.

Full-Stack Web Development (MERN)

- Design and develop scalable front-end web interfaces using **React.js**.
- Build high-performance APIs and backend services using **Node.js** and **Express.js**.
- Manage database schemas, queries, and performance optimization using **MongoDB**.
- Implement secure, RESTful and GraphQL APIs.

Technical Leadership & Collaboration

- Lead architecture discussions, code reviews, and best-practice implementations.
 - Mentor junior developers and contribute to team skill growth.
 - Work closely with product managers, designers, and QA teams to define project requirements and timelines.
 - Drive continuous improvement in development workflows, CI/CD pipelines, and DevOps processes.
-

Required Skills & Qualifications

- **5–8+ years** of professional experience in software development (**MERN stack**).

- **3–5+ years** of hands-on experience in **React Native** mobile development.
 - Strong proficiency in JavaScript (ES6+), and modern front-end patterns.
 - Excellent understanding of mobile app architecture, offline storage, push notifications, and third-party integrations.
 - Strong understanding of REST APIs, GraphQL, WebSockets, and real-time communication.
 - Familiarity with cloud services (AWS, Firebase, GCP) and CI/CD pipelines.
 - Experience with Git, Agile methodologies, and code quality tools.
 - Ability to design scalable architectures for both mobile and web platforms.
-

Preferred (Nice-to-Have) Skills

- Experience with native Android/iOS development.
 - Knowledge of Docker, Kubernetes, or serverless architectures.
 - Experience working with analytics tools, crash reporting, and mobile performance monitoring.
 - Understanding of UI/UX principles.
 - Experience with automated testing (Cypress).
-

Soft Skills

- Strong problem-solving and debugging skills.
 - Excellent communication and leadership abilities.
 - Proactive, detail-oriented, and capable of working independently.
 - Ability to thrive in a fast-paced, dynamic environment.
-

Education

- Bachelor's or Master's degree in Computer Science, Engineering, or related field (or equivalent practical experience).
-
